| <p>ASSAY INFORMATION: ViroKey SARS-CoV-2 RT-PCR Test</p> <p>The performance characteristics of this test were validated by Apple/Sunrise Diagnostics Laboratory in agreement with the FDA guidance document. This test uses RT-PCR followed by bead hybridization for detection of SARS-CoV-2 specific targets(ORF1a gene)and (N gene). Sunrise Diagnostic Laboratory is designated as a High Complexity Laboratory by the CLIA and is qualified to perform this test. This test has been authorized by FDA under an Emergency Use Authorization (EUA).</p> <p>A nasopharyngeal specimen is the preferred choice for swab-based SARS-CoV-2 testing. Per the FDA, sub-optimal specimen collections may be accepted for analysis although these specimens may have decreased sensitivity, so caution should be exercised when interpreting negative results.</p> |              |          |              |       |                 |      |

END OF REPORT
